## Does It Float or Sink?

Does an orange float when it has been placed in water? On the other hand, would an avocado sink?

This may seem like a straightforward question...but is it?

## You Will Need:

Deep boul or container filled with water
Various fruits or vegetables (oranges, zucchini, apples, avocados, lemons, potatoes, mangoes, and bananas)

## Method:

1. Fill the bowl with water.
2. Before placing a fruit or vegetable in a bowl, predict if you think the fruit or vegetable will float or sink.
3. One at a time, place each fruit or vegetable in the water. As you place them in the water, watch what happens, making sure you record your results on the 'Fruit and Vegetable - Float or Sink?' activity sheet.

| Fruit or Vegetable | Float or Sink | Give reasons why <br> you think this may <br> have happened. |
| :--- | :--- | :--- |
| Orange | Float | The peel may have air <br> pockets in it. |
